**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Raj Talluri et al. ("A Robust, Scalable, Object-Based Video Compression Technique for Very Low Bit-Rate Coding")

Regarding claims 1,3-4 and 6-7, Talluri shows a moving picture decoding method of subjecting a bitstream to a decoding processing of the coded data on p.221 (left column ll.8-9) comprising:

An error detection process of detecting a first and second error occurring during the transmission of the bitstream and a concealment process to conceal the decoded image data in figs 8 a and b (p. 223 right column ll.17-30, p.229 right column l.20 – p.230 right column l.8).

Regarding claims 2-6 and 8, Talluri shows a moving picture decoding method comprising a process of judging whether or not the bitstream has shape information indicating the shape of the moving picture in figs.2 and 4 (p.225 left column l.10 – p.226 right column l.15)
